## SLO 12CRA

SL-series plug-in relay

## Main features

- Solid state output relay
- cULus Listed, CE (EMC and LVD)
- Integrated status LED
- For resistive and inductive loads

## Functional block diagram

## Main specifications

| Breakdown voltage I/O | minimum | 4300 | VAC rms |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: | :---: | :---: | :---: |
| Air/creepage distances I/O | minimum | 8 | mm |  |  |  |  |
| Capacitance I/O | typical | 3 | pF |  |  |  |  |
| Material of the casing | PBT | UL 94V-0 |  |  |  |  |  |
| Colour of the casing |  |  |  |  |  |  |  |
| Weight | typical | Red | g |  |  |  |  |
| Temperature range: |  |  |  |  | range | $-40 \ldots+70$ | ${ }^{\circ} \mathrm{C}$ |
| Storage | range | $-25 \ldots+70$ | ${ }^{\circ} \mathrm{C}$ |  |  |  |  |
| Operation |  |  |  |  |  |  |  |

## Electrical specifications ( $T_{\mathrm{A}}=25^{\circ} \mathrm{C}$ )

| Primary |  |  |  | Secondary |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Input voltage | nominal | 12 | VDC | Load voltage | minimum | 0 | VDC |
| Input current at nominal voltage | typical | 9 | mA |  | nominal | 250 | VDC |
|  | maximum | 12 | mA |  | maximum | 300 | VDC |
| Input voltage range (abs.) | minimum | 9 | VDC | Load current | maximum | 1,8 | A |
|  | maximum | 18 | VDC | Load current | maximum | 12 | A (10 ms) |
| Input impedance | typical | 1,3 | $\mathrm{k} \Omega$ | Voltage drop | typical | 1 | $\mathrm{V}(1,8 \mathrm{~A})$ |
| Switch-on voltage | typical | 8 | VDC | Switch-on delay | typical | 0,3 | ms |
|  | maximum | 9 | VDC |  | maximum | 0,5 | ms |
| Switch-off voltage | typical | 7 | VDC | Switch-off delay | typical | 0,3 | ms |
|  | minimum | 6 | VDC |  | maximum | 0,5 | ms |
|  |  |  |  | Inductive load, L/R | maximum | 10 | ms (250 V, 1,8 A) |
|  |  |  |  |  | maximum | 100 | ms (24 V, 1,8 A) |
|  |  |  |  | Leakage current (off-state) | maximum | 1 | mA |

Ambient temperature $\left(T_{\mathrm{A}}\right)$ means the temperature immediate in vicinity of relays, where the air flow meets the relays.

## Temperature derating

Allowed load is derated to $1 / 3$ linearly from $+30{ }^{\circ} \mathrm{C}$ to $+70{ }^{\circ} \mathrm{C}$ ambient temperature. When relays are mounted together as a bank the maximum load current for long period of time should be restricted in total to $50 \%$ of the current from the curve. I.e. all relays at $50 \%$ load continuously or $50 \%$ of the relays at 100 \% load continuously or all relays at $100 \%$ load $50 \%$ of the time. This restriction does not apply if there is at least $12,5 \mathrm{~mm}$ gap between relays.

Derating curve for SLO 12CRA.

## Derating when switching inductive loads

This relay is meant for resistive and inductive loads. The surge current is not allowed to exceed the specification. For reasons of heat dissipation, when the load will be switched frequently, the average current over a reasonable time should not exceed the specification for continuous operation.

Derating curve for inductive loads.

## Fusing

To protect relay against short circuit and overload a fast fuse with the correct rating for the load and the capacity of the relay should be chosen. Note that when overload current is not large it is possible that the fuse will not protect the relay because of the tolerance on the fuse rating.

## Assembling

All MOS 1... -mounting sockets, all MB/MBS 8/16... -mounting bases.

## Mechanical dimensions

SLO-relay (plug-in), dimensions in mm.

## Approvals

| $\begin{aligned} & \text { c US LISTED } \\ & \text { IHMB } \\ & \text { IND. CONT. EQ. } \end{aligned}$ | Certificate: E162828 |
| :---: | :---: |
| CE | Fulfils main requirements of the EMC-directive 2004/108/EC. Fulfils requirements of the low voltage directive (LVD) 2006/95/EC. |

## Guarantee

This solid state I/O relay type made by Delcon Oy is guaranteed free from design and manufacturing defects for a period of 10 years from the manufacturing date. The guarantee liability is limited to replacement of defective material and related shipping charges. Defective products must be returned to the manufacturer for evaluation. This guarantee does not cover damage due to incorrect use or electrical overload.
