The data in bold type relate to the standard versions of the relays. ❶ Values refer to new relays, which have not been used for signals exceeding the maximum 10 mA and/or 6 V (DC or AC). After the current exceeds 10 mA and/or 6 V (DC or AC) relay can not be used for signals with the minimum values indicated in the technical data sheet. ❷ Must release voltage are the values of the operating supply voltage range of opposite polarization, specified in Table 1. ❸ Coil terminals position is indicated by the vertical strip on the relay cover.
